Unit 2, Bagley Industrial Park
North Field Road, Dudley,
DY2 9DY

Established in 1999, our factory lies in the heart of The Black Country.

The initial focus of the business was manufacturing thermal transfer media, particularly customised and short-to-medium volumes.

After over 20 years of continuous growth and investment we now offer a broad range of label and tag products which are manufactured on state-of-the-art machinery by a loyal and dedicated workforce.

Our route to market is through distributors of in-plant printing systems as well as through finished label distributors such as paper and web catalogues.

Our modern fleet of production equipment is constantly upgraded and operated by a highly trained and skilled team, leading to the production of reliable and high-quality labels.

We pride ourselves on delivering solutions to some of the most challenging label applications. Whether the problems are to do with compliance, temperature, abrasion, difficult surfaces, hostile environments, or novel label applications. We have an unrivalled track record in delivering high quality, cost effective label solutions quickly and efficiently.

We offer a friendly, honest and professional customer service built around a state-of-the-art MIS and years of industry experience. Custom artwork needs are met by our in-house artwork department using the complete Adobe suite.

CAPABILITIES

As industry leaders, we provide the best quality label printing from self-adhesive labels to tags for your business, nationwide. Our labels can be printed to just about any design that you require with our state-of-the-art manufacturing capabilities. Inc.
