

Data Sheet – #1307

WHITE GLOSS FILM COMPOSTABLE PERMANENT

General #1307 is a white, high-gloss film with a print receptive coating. It is produced from wood pulp sourced from managed plantations. Good initial tack and adhesion on wide variety of substrates.

Applications This material can be used for all kinds of applications but is specifically suited for applications where the complete packaging should be biodegradable and where indirect or direct food contact with dry foodstuff is required. The film also has a good resistance to oils and grease. It is sensitive to temperature and humidity, these parameters will potentially cause the film to shrink. It is recommended to test suitability under various conditions. It is also recommended the storage in its original wrapping away from any source of local heating or direct sunlight.

Application temperature Minimum 5°C

Service temperature -20°C to +80°C

Product life 6 months when stored at 20-25°C | 40-50% RH

Special considerations The adhesive is compliant with European food regulations 1935/2004/EC for direct food contact with dry, non-fatty foodstuff.

The adhesive complies with DIN EN 13432 biodegradability and compostability regulation and is OK compost certified under the tracking number S0259.

All data given is considered reliable but does not constitute a warranty. It is the responsibility of the user to satisfy themselves as to the suitability of the product for the particular application and conditions. A sample for this purpose will be supplied on request.
