

## Data Sheet – #1310

## PET FLAKE CLEAR PERMANENT

**General** #1310 is a clear, polypropylene film. The film is orientated biaxially and has a good print-receptive finish.

**Applications** Applications are predominantly in market segments where rigid containers are used (e.g Glass, PET). Due to fairly rigid nature of the film, care should be taken with use on non-uniform surfaces and where a high level of squeezability is desired. Applications are predominantly in beverage, food and HPC market segments where PET bottles and PET containers are used. Due to the rigid nature of the film, care should be taken with use on non-uniform surfaces and where a level of squeezability is desired.

Automatic application: a robust PET liner allows for consistent, snap fre, application on high speed lines.

Automatic application: the robust film liner allows for consistent, snap fre, application on high speed lines.

**Application temperature** Minimum 5°C

**Service temperature** -20°C to +60°C

**Product life** 2 years when stored at 20-25°C | 40-50% RH

**Special considerations** This material is compliant with the European regulations 1935/2004/EC, German Recommendation (BfR) XIV and FDA § 175.105.
