

Data Sheet - #303

CLEAR MATT FASCLEAR PLUS

General #303 is a clear permanent adhesive featuring excellent UV resistance and weatherability together with good adhesion performance, even on apolar substrates.

Applications Predominantly in cosmetics and toiletries: areas requiring high quality graphics together with consistent functional performance during automatic application and in end use. The specially engineered film provides good MD rigidity. The transparent, matt finished film gives good blend into today's matt plastic containers, without the need for colour matching. To obtain a high gloss the label can be overvarnished. Material is a good alternative in those situations where PVC is no longer accepted. The film is printable via thermal transfer, when matched with the correct ribbon and machine setting, giving the opportunity for variable onto durable labels.

Application temperature Minimum 5°C

Service temperature -20°C to +80°C

Product life 2 years when stored at 22°C | 50% RH

Special considerations The adhesive complies with the European food directives and legislations, FDA 175.105 and the German recommendations XIV as published by BfR. BfR (Bundesinstitut für Risikobewertung) is the German Federal Institute for Risk Assessment. The adhesive can be used in direct contact with dry and moist, non fatty foodstuffs.

Laminate has a total caliper of 0.149mm +/- 10%
