

Data Sheet – #704r

THERMAL ECO BPA FREE-FSC

General #704r is a paper with a high sensitivity thermal coating produced totally without BPA-based chemistry. The pulp for this paper comes from FSC certified forest management and other controlled sources. Limited resistance to thermal image scratching or smudging.

Applications This is a general purpose product is designed to produce non-top coated direct thermal labels for retail, transport & logistical applications. It has good convertability, direct thermal printability and ambient temperature performance. It has good adhesion to all normal substances, including non-polar surfaces, films and corrugated boards. It also performs well in low temperatures. Not suitable for labelling plasticised PVC and the product has limited resistance in wet conditions. Not recommended for labelling highly curved surfaces.

Application temperature Minimum 0°C

Service temperature -20°C to +80°C

Product life 2 years when stored at 20-25°C | 40-50% RH

Special considerations Prolonged storage at high temperatures and / or humidity levels will shorten the shelf life.

All data given is considered reliable but does not constitute a warranty. It is the responsibility of the user to satisfy themselves as to the suitability of the product for the particular application and conditions. A sample for this purpose will be supplied on request.
