

**Data Sheet - #789a**

**VOID REVEAL MATT SILVER POLYESTER**

**General** #789a is an imprintable matt silver polyester film, with a special absorbent surface coating, void printed. The adhesive is perfectly suitable for uses that need a good resistance to UV, fats or solvents. Good general adhesion performance on a wide range of substrates.

**Applications** Once applied to the substrate, on removal an irreversible "void" footprint message - formerly invisible to the eye - will detach itself from the face film. Labels which have been removed cannot be reapplied since repositioning will leave visible proof that tampering has taken place.

**Application temperature** Minimum +5°C

**Service temperature** -40°C to +90°C

**Product life** 2 years when stored at 20-25°C | 40-50% RH
