

**General** #863 is a metalized polyester film with a matt surface. The film is treated with a special top coating for printing. The feature of this product is the film delaminates and releases an adhesive layer with the writing 'VOID'. The removed film is completely free from adhesive once removed. The writing is only partially visible until the label is removed.

**Applications** Tamper evident security seal, warranty labels and asset identification labelling.

**Application temperature** 4°C

**Service temperature** -30°C to +120°C

**Product life** 2 years

**Special considerations** Very good chemical and elevated temperature shear resistance. Suitable for indirect contact, in accordance with FDA 175.105
